Daniel Kelly

MECHANICAL ENGINEERING STUDENT

About Me:

I am a happy, positive, friendly and hardworking individual. I have graduated from year 12 and I am looking to enter the workforce to gain some real work/world experience during my university studies as I intend to work part time whilst I study. I have an inquiring technical mind and my intention is to join an industry that reflects my interests.

Work & Studies:

Instructor - Bricks 4 Kidz

- I have been employed as an instructor at B4K since December 2025. In this role I work in after school childcare multiple days a week.
- This has taught me advanced skills in client relations and de-escalation techniques.

Pathway Degree

- I am currently in the last weeks of finishing my pathway degree in engineering studies at Western Sydney University. I have completed both advanced mathematics and physics and I have received a GPA of 6.143.
- I will be continuing my studies at Western Sydney university in the coming years working towards getting my bachelors in mechanical engineering.
